

Motor Vehicle Reports with DATA INSIGHTS - get *more* than a PDF

The ClearConnect Solutions Difference

Motor Vehicle Reports are one of the most useful tools for assessing and mitigating driver risk. ClearConnect Solutions' MVR Service offers insurers and fleet managers an **ADVANTAGE**.

Automated, Auto-Adjudicated MVR's

Eliminate administrative work, costs and errors (typically associated with MVR processing), expedite policy approvals with greater accuracy, maintain driver compliance and qualification status.

Risk Monitoring Combined with MVR's

Why not use MVR data with a Risk Monitoring Service that gives you ongoing reporting for the entire year? Just because MVR's are often pulled at policy renewal or hiring time doesn't mean driver risk stops. Ongoing monitoring keeps you informed year-round, automatically.

More qualified drivers with clean driving records means fewer claims and costs for you.

BENEFITS

- Run over 250+ MVR's at once!
- Reduce human errors
- API integration
- Driver qualification status is always in check
- Insurance policies are **MORE** accurate
- Insurance premiums, claims and losses are reduced
- Get notifications for violations/incidents or status change
- PDF report + extracted data for customizable reporting
