

Motor Vehicle Records with Risk Monitoring

Driving Violation? Be the First to Know.

Automated Risk Monitoring with Motor Vehicle Records provides valuable insights and visibility into a driver's status change and violations.

FMCSA and DMV data is captured and monitored through ClearConnect Solutions' data analytics technology, tracking any changes on a driver's record.

Reporting categorizes drivers based on risk level from a clean record to high-risk, helping fleet managers and insurers manage risk and intervene **BEFORE** it disqualifies a driver or license points accumulate.

How Risk Monitoring Works

1. Automated violation alerts and insights are sent to your dashboard
2. Quickly intervene before license points accumulate
3. Avoid inflated insurance rates due to high-risk

Monitoring Alerts Include:

- Driving violations (drug/alcohol, speeding, traffic, loading, parking, etc.)
- License status and class
- Crashes
- Other non-driving incidents

BENEFITS

- Reduces crashes
- Reduces claims and litigation costs
- Reduces insurance premiums
- Automates violation alerts
- Simplifies driver risk management
- Improves safety
