

Motor Vehicle Records with Auto Adjudication

Expedite Policy Approvals with Automation.

Auto Adjudicated Motor Vehicle Records automate the insurance approval process for a driver or fleet's claims, policy issuance, or renewals.

ClearConnect Solutions' data analytics technology combines data from MVR's, FMCSA, DMV and telematics systems in one platform. Predefined compliance and program criteria is set by the user and then processed automatically, **resulting in a simple pass, fail, or undetermined status.**

Insurers and fleet managers save on time, costs and errors – typically associated with manual MVR processing.

How Auto Adjudication Works

1. Run over 250 MVR's at once
2. Automate a "Pass" or "Fail" return based on your program criteria
3. Instantly see and address why a driver received a "fail" status
4. Quickly find the right insurance coverage with greater accuracy

BENEFITS

- API integration streamlines workflow
- Reduces human errors
- Expedites the insurance approval process
- Onboard more drivers and insureds faster
- Driver qualification status is always in check
- Insurance policies are more accurate

MVR's with DATA INSIGHTS – get more than a PDF
The Acrisure + ClearConnect Solutions Difference

**1 manual MVR
screening takes
~15 min to review
x 1,000 drivers
= 250 hrs.**

**Auto adjudicated
MVR's take
seconds.**
