

AI-powered driver safety, for impactful results.

ClearConnect
SOLUTIONS

+  **TruckSpy**

ClearConnect Solutions Marketplace™ Partner

**DRIVER
MONITORING**

Benefits

- Dramatic reduction in risky driving behavior
- Real-time alerts and live coaching
- Broader range of detectable behaviors (than traditional G-force based systems)
- Improved driver scoring
- Better driver retention

The TruckSpy and ClearConnect Solutions Difference

TruckSpy's AI-powered dash cam, Driver•i, raises the bar for mitigating risk and improving safer driving behaviors. With the ClearConnect Solutions and TruckSpy partnership, you'll experience a notable difference in the safety and performance of your fleet.

TruckSpy and ClearConnect Solutions partner together, bringing you the next generation of driver safety. Meet Driver•i - TruckSpy's proprietary AI-powered dash cam. Driver•i is a proven and advanced safety tool that monitors driver behavior, provides real-time driver coaching, and connects safety managers with their fleets.

Driver•i by TruckSpy - A better kind of dash cam

Are you ready to make a real impact on the safety of your fleet, but keep running into the same dead ends? Driver•i by TruckSpy is the only dash cam that mitigates driver risk by **monitoring 40+ risky driving behaviors** - powered by artificial intelligence and created specifically with the truck driver in mind.

Driver•i is the most advanced dash cam on the market - and is proven to **reduce risky driving behavior by 80% in just 60 days**.

Driver•i offers fleets a dashboard-like experience that provides transparency and the ability to gamify safe driving performance. When paired with ClearConnect Solutions' Telematics and ClearTrac compliance technology, it gives fleet owners access to a full suite of services that elevate fleet performance, safety, and efficiency to a whole new level.

How does Driver•i work?

Driver•i is powered by advanced technology and makes it simple to reduce risky driving behavior - fast. The AI-powered dash cam captures positive and negative driving events and sends audible alerts to drivers in real-time.

How it works:

1. Safety managers review dash cam recordings and alert drivers.
2. Drivers watch recordings and implement feedback.
3. Drivers compete to improve their safety score via a shared dashboard (on their tablet).
4. Coaching sessions can take place anywhere, anytime.

TruckSpy has documented success with clients, resulting in improved driver safety scores, better driver retention, AND even a bit of fun with safety score competition.

Sign up today and experience the next generation in **driver safety**.
