MVR Dashboard

Understand Driver Trends and Risk with a Quick-View

The Motor Vehicle Record (MVR) Dashboard gives fleets and insurers a customized dashboard of a motor carrier's driver demographics, risk-related incidents and other non-driving records.
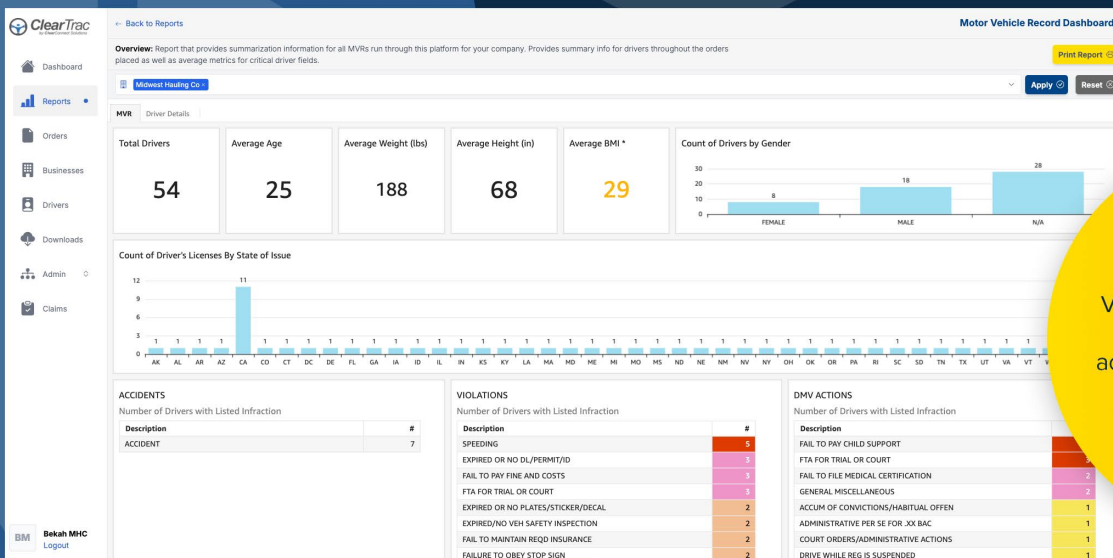

ClearConnect Solutions' platform captures real-time data from the Department of Motor Vehicle and aggregates it into insights on driver risk, in addition to general driver composition trends like age, gender and health.

KEY BENEFIT:

Fleet operators and insurers gain a better perspective on their driver workforce, stay informed about driver risk, easily identify patterns, and address risk in real-time.

How It Works

Log into the ClearConnect Solutions platform and see your custom LIVE dashboard with optional views or download it as a pdf for a snapshot and easy sharing.

Dashboard Example:
Violations per driver based on infraction type, DMV action taken and correlation to driver demographics.

Get Answers to Common Questions with MVR Dashboard Insights

- What violations are most common?
- Do these violations correlate to higher risk?
- What are the driver demographics that make up my fleet?
- Do specific trends relate to risk patterns in my fleet?
